

Ant

Aa

Ask your child:

- How many letters are in the word above the animal? (Count them together.)
- What sound does the animal make?
- How does the animal move? Show me how you can move like the animal!
- Where you do see the animal?
- Tell me about an animal you have seen! What color was it?
How did it feel - scratchy, soft, rough, or smooth?
- How many legs does it have? (Count together!)
- I wonder what the animal eats? How can we find out?

Caregiver tip:

Ask your little one lots of questions. Why? Because research shows that questions get young children's brains firing in unique ways, even if they do not answer verbally
